

G.C.F. Group – Generale Costruzioni Ferroviarie S.p.A.

---

---

- The company's origin dates back to 1948, when its founder Giacomo Ferroli established it as sole proprietorship enterprise. In the immediate post-war period, Ferroli was mainly working for the company SADE – which at the time was the TSO of the high-voltage network serving the Triveneto area in the North-East of Italy – and afterwards, following to the nationalization of the network, for ENEL. Nowadays, its main client is TERNA RETE ITALIA S.p.A., the TSO of the Italian high-voltage network.
- After the heirs joined Ferroli in the management of the activities, in 1980 the company was transformed into a Limited Company, under the name of Ferroli & C. S.r.l.
- Over the years Ferroli broadened its operativity, beside the HV sector, also to the construction of electrical pipelines, of viaducts, and to the execution of civil and industrial works, with no limitations, including geological prospecting, and manufacturing and trade of building products.
- In the '90s, Ferroli began developing its operations abroad, in Germany and Austria. Main clients:
  - ✓ ABB Group
  - ✓ SAG
  - ✓ DB ENERGIE
  - ✓ VLB Leitungsbau
  - ✓ AUTMATEC
  - ✓ LTB
- In 2005 the company achieved two further targets, by obtaining two relevant qualifications:
  - ✓ in Germany with DB Energie (Deutsche Bahn AG), operator of the railway's power network;
  - ✓ in Austria with TIWAG (Tiroler Wasserkraft AG), operator of the power network in Tyrol.

- Within this context Ferroli set up a collaboration with Azienda Energetica Trasmissione Alto Adige S.r.l., which led to the execution in Joint Venture of several projects in Germany and Austria relatively to the construction of new high-voltage lines and the dismantling of existing ones.
- In 2022 Ferroli became part of the industrial Group Generale Costruzioni Ferroviarie S.p.A., a leading Italian construction group (Revenues 540 M€, FTE 1,600), thanks to which the company is now boosting its consolidation within the Italian market and the development of its international operations and collaborations.
- 2024 has been a crucial year for the company renovation process: from the entry in the management of a pool of experts in the HV sector to remarkable investments in operative human resources and equipment, from the internal reorganization to its rebranding, from the adoption of the new name GCF POWER S.r.l. to the further development of national and international interests.
- Nowadays the core business of GCF POWER S.r.l. is the construction and maintenance of high-voltage transmission lines. Such business, traditionally carried out by very few operators on the national territory due to its specificity and to the high technological competence required, is acknowledged as being a sector with a high degree of specialization.

## CATEGORIES

**OG1** - Civil and industrial buildings

**OG3** - Roads, motorways, bridges, viaducts, railways, subways

**OG6** - Aqueducts, gas pipelines, oil pipelines, irrigation and drainage works

**OG8** - River, defense, hydraulic, and drainage works

**OG10** - Systems for high to medium voltage transformation and electricity distribution in alternating and direct current, and public lighting installations
